Dear Sir/Madam,

This is my fifth times of writting you this email since last year till date but no response from you. Hope you get this one, as this is a personal email directed to you. My wife and I won a Jackpot Lottery of \$11.3 million in July and have voluntarily decided to donate the sum of \$500,000.00 USD to you as part of our own charity project to improve the lot of 10 lucky individuals all over the world. If you have received this email then you are one of the lucky recipients and all you have to do is get in touch with us so that we can send your details to the payout bank. Please note that you have to contact my private email for more informations (allenvioletlarge2@ozledim.net)

Reinforcement Learning

Reinforcement Learning

- No explicit training data set.
- Nature provides **reward** for each of the learners **actions**.
- At each time,
 - Learner has a **state** and chooses an **action**.
 - Nature responds with **new state** and a **reward**.
 - Learner learns from reward and makes better decisions.

DARPA Grand Challenge

DARPA Grand Challenge

- International competition for building **autonomous ground vehicles**.
- Conducted by **Defense Advanced Research Projects Agency** (DARPA) of United States.
- Challenge was to build a **driverless car** that can navigate through a difficult track without human intervention.

DARPA Grand Challenge

- DARPA Grand Challenge 2005 was won by the [Stanford Racing Team](#).
- [Supervised learning](#) used to control speed and identify obstacles.
- [Unsupervised learning](#) used to find the path.
